Design, Create, Innovate.

At Trinotech IT Solutions, we empower clients to shape the future through our technical expertise, business intelligence, and deep cross-industry experience. Our comprehensive suite of solutions includes IT Hardware and Infrastructure, UCaaS, VaaS, and IPPBX/Gateway systems. Furthermore, we specialize in high-performance Mobile and Web App Development, Cloud Services, and strategic Digital Marketing. To ensure our clients meet their core business objectives, Trinotech prioritizes building and maintaining strategic alliances with distinguished international partners to deliver precision-tailored solutions.

What We Do

IT Equipment, Software and Consumables

Trinotech IT Solutions is your one-stop shop for all IT consumables and hardware. We supply premium laptops, desktops, hard drives, and portable storage solutions tailored for office use. Additionally, we offer a comprehensive range of accessories, including headphones, printers, cartridges, and tablets, to keep your business running smoothly.

Network , Security and Wireless

We view IP networking as the fundamental platform for your business functions and communications—a powerful differentiator in today's market. Our enterprise networking solutions accelerate innovation, creating tangible value while ensuring your infrastructure remains resilient and always available.

As user data and devices become increasingly mobile, security threats evolve in parallel. We have built our service offerings around best-practice methodologies and flagship products to provide our clients with the most robust protection against modern cyber threats.

Furthermore, we deliver comprehensive wireless solutions that provide 'anywhere, anytime' access to network resources through a wide range of indoor and outdoor mobility services. Trinotech takes specialized care of your network edges, ensuring seamless connectivity to all your applications, regardless of the device you use.

Server, Storage and Virtualization

Whether you require a general-purpose server or a system for data-intensive applications, the current market offers a wide array of high-performance rack servers. While Dell EMC, HPE, and IBM remain the top three providers, vendors like Lenovo, Huawei, and Inspur are strong competitors, alongside unique offerings from Cisco, Fujitsu, and Oracle.

Trinotech IT Solutions enhances your production capabilities by meeting all your server and storage requirements through intelligent resource utilization and cost-effective solutions. We offer high-value data center cloud subscriptions and support you in transitioning from physical hardware to virtualized environments. Our services include cloud-based or onsite deployment, seamless integration with vendor products, and flexible, subscription-based data center solutions.

IP Telephony and Contact Centre Solutions

Is the current technology transition leaving you with questions? At Trinotech IT Solutions, we provide expert guidance and solutions tailored to your IP telephony requirements. We have collaborated with a wide range of industry-leading providers, including:

Avaya (IP Telephony & Contact Centers)

Panasonic, Yealink & Grandstream

Microsoft Teams

Ribbon SBC Gateway Solutions

If you are looking to leverage Microsoft Teams, we can help you migrate and satisfy all your voice requirements within the MS Teams ecosystem. Additionally, we utilize Ribbon SBC solutions to ensure your voice and video infrastructure is secure, robust, and complete.

Structured Cabling, CCTV and Access Control System

Video surveillance systems are an essential tool for enhancing security and gaining visual oversight of daily operations. Trinotech specializes in the installation and seamless integration of surveillance systems across various network environments. Whether you require a simple two-camera setup or a robust, cloud-based enterprise system, we design and deploy the ideal solution for your business.

We install comprehensive access control cabling to support all primary components—from card readers and door contacts to retinal scans and advanced biometric security features. Our clients benefit from integrated security systems built on open-architecture designs and industry best practices.

Furthermore, our cabling professionals offer a full suite of services, including the design, installation, testing, and documentation of structured network data cabling. We install, terminate, and certify Category 6A voice and data cabling, as well as coaxial, fiber optic, Ethernet, LAN, and WiFi networks.

AV Integration and Video Conferencing

AV Integration has fundamentally transformed the modern meeting space. Trinotech IT Solutions provides end-to-end automation at your fingertips, addressing all audio-visual requirements. Our expertise includes Projection and Screen Equipment, PA systems, Digital Signage, Interactive Displays, Information Kiosks, Auditorium Systems, and Video Walls.

One of the most compelling reasons to implement a video conferencing solution is the immediate Return on Investment (ROI). The world has evolved beyond simple video calls toward immersive, lifelike interactions that allow you to make critical decisions based on visible body language and non-verbal cues. To ensure a seamless experience, Trinotech IT Solutions integrates industry-leading technologies from Poly, Microsoft, Zoom, and Logitech, ensuring they all work in perfect sync.

Mobile and Web App Development

At Trinotech IT Solutions, we prioritize design simplicity and a superior user experience, tailoring every stage of the development process to our clients' specific requirements. We leverage modern web capabilities to deliver a native app-like experience, ensuring secure, high-performance, and fast-loading web pages.

Develop the application your business needs today. Our core technology stack includes:

Frontend: HTML5, CSS3, JavaScript (React, Angular, or Vue)

Backend: Python, Node.js, PHP, or .NET

Mobile: Flutter, React Native, Swift, Kotlin

Website Development And Web Hosting

If you are looking for a reliable partner to build high-quality websites at competitive rates, our experienced developers and designers are here to help. In addition to custom web development, we provide robust, low-cost hosting solutions for both websites and mobile applications.

IT AMC Services (Annual Maintenance Contract)

In the digital era, the smooth functioning of hardware and software components is crucial for business operations. Our services in this domain include:

Regular updates and upgrades to keep your systems running smoothly.

Expert technicians to handle hardware maintenance, ensuring longevity and optimal performance.

Software troubleshooting to resolve issues swiftly, minimizing disruptions to your business operations.

We understand the critical role hardware and software play in your business success. Partner with us for comprehensive support that goes beyond maintenance, empowering your digital ecosystem for sustained growth and efficiency.
